
A completed travel questionnaire MUST be handed in before a travel
Vaccination appointment can be arranged.

Travel Health Questionnaire and Declaration

**The Practice receives a limited number of vaccinations for travel purposes,
therefore these can only be offered subject to availability**

Please complete a form for each member of your party.
Please return the completed questionnaire **at least 4 weeks** prior to your date of departure.
Please be aware for complex travel (multiple destinations) you must make an appointment with a specialist travel
clinic.

www.fitfortravel.nhs.uk

www.malariahotspots.co.uk

www.fco.gov.uk (add Nathnac)

Declaration

Patients requesting a travel appointment with the nurse must be aware that this practice provides basic travel vaccinations only, we are not a travel clinic and therefore if travel advice is required or specialist vaccinations (such as rabies or yellow fever) then this should be sourced from a specialist travel clinic (Details available at reception).

The following vaccinations are offered by the practice:

Hepatitis A (subject to availability)
Hepatitis B (subject to availability)
Typhoid (subject to availability)
Tetanus, Diphtheria, and polio combined.

If any other vaccinations are required we may advise this, but will not be able to provide further details. Furthermore patients are responsible for ensuring that they complete a travel form well in advance of travelling so that there is adequate time for an appointment to be made, and any vaccinations given have chance to become effective, as they do not give instant immunity.

If the practice is unable to supply vaccines before planned travel, patients may wish to source them from a private provider, or a pharmacy that offers this service.

I hereby sign to state that I have read the above declaration and understand that this practice will provide basic travel vaccinations (subject to availability) and that I am aware that specialist advise or vaccinations should be sourced at a specialist travel clinic
